CUSTOM SLIDES

Convert JPEG images, Flash animations as well as AVI and Quicktime movies into ready-to-use Digital Cinema Packages that will work on any digital cinema server! With Qube Master Xpress, you have the freedom to do all that you used to even on your digital cinema server. Statutory warnings, offer slides and local advertisements can all be instantly converted to DCPs in your own projection booth.

New with QubeMaster Xpress 2:

- Re-engineered transcoding algorithms (based on the QubeMaster Pro engine)
- Multi-threading and CPU-optimized for enhanced performance
- Modular design allows users to select capabilities, or add-on capabilities later
- Optional support for 4K and stereoscopic 3D DCPs

System Requirements

QubeMaster Xpress 2 requires a laptop or workstation with a dual-core, or multi-core processor and Windows 7, Windows Vista or Windows XP.
